

SMART Board™ 600i interactive whiteboard system

The third-generation SMART Board™ 600i interactive whiteboard system combines an award-winning SMART Board interactive whiteboard, a UF55 projector and an extended control panel.

Adding flexibility to instruction, the 600i enables teachers to easily access and control all their classroom technology from one source. It's a complete system that offers you extraordinary features at an affordable price.

Enhance teaching experiences

With the 600i, teachers have centralised control over the UF55 projector and classroom peripherals. The extended control panel enables them to start the system in 10 seconds and easily switch between multimedia devices including DVD players, document cameras and laptops.

The system has a sleek and integrated design that keeps the boom-mounted short-throw projector out of the way, ensuring shadows and other distractions don't interfere with teaching and learning. And because the 600i features one of the best projected images of any interactive whiteboard system, lessons will look crisp and bright.

Simplify installation and maintenance

The 600i is designed to be easy to install, manage and protect. The projector is located directly above the interactive whiteboard, eliminating the need for complicated wiring or ceiling mounting. And since the system is networked, you can connect the projector to your school's IP network to remotely control and manage it.

The comprehensive security features of the 600i keep your investment protected. The projector is rendered inoperable if removed from the extended control panel or remote, and the Kensington® lock slot and projector padlock loop provide additional theft deterrents.

Expand your work space

For classrooms that use wide-screen laptops or monitors, the 600i is one of the only systems available in a wide-format option. It offers 20 percent more space, giving your teachers extra room to work. This option, the 685i3, combines the 87" wide-format SMART Board 685 interactive whiteboard with the UF55w, a projector with a 16:10 aspect ratio and native WXGA (1,280 x 800) wide-screen projector resolution.

- 1 SMART Board interactive whiteboard – a touch-sensitive interactive whiteboard that connects to your computer and projector, showing the computer’s desktop image
- 2 UF55 projector – an integrated XGA (1024 x 768) projector that offers a 4:3 native aspect ratio and support for 16:9, 16:10 and 4:5 ratios
- 3 Extended control panel – provides centralised control over the classroom technology

Key features

Network enabled

The projector is network enabled, so it can be connected to your school’s IP network to enable commands to be sent or received through the Web server or SNMP client.

Theft resistant

The projector is rendered inoperable if removed from the extended control panel or remote, while the Kensington lock slot and projector padlock loop act as additional visual and physical deterrents.

Long lamp life

The system’s lamp lasts for 3,000 hours in standard mode and 4,000 hours in economy mode.

Closed projector engine

The UF55 projector uses DLP® technology and does not require cleaning or filter replacement.

Wide-format option

The system is available in wide format, providing 20 percent more working space.

Multi-position boom

At installation, the UF55 projector and boom can be configured to accommodate multiple room sizes and SMART Board interactive whiteboard models, including the 560, 580, 660, 680 and 685.

SMART Notebook™ software

The 600i comes with award-winning SMART Notebook software, which is setting the standard for creating, teaching and managing interactive lessons within a single application.

Warranty

The interactive whiteboard comes with a five-year warranty upon registration. The UF55 projector has a three-year warranty.

UF55 projector

Total size

18 1/2" W x 15 1/2" H x 47 1/4" D
(47 cm x 39.4 cm x 120 cm)
